

# Ángel Alejandro Viveros Aguilar

Yucatán, Mexico • GitHub (Vaips26) • angelviverosaguilar@hotmail.com • 9993668391

Software Engineer specializing in **Automation Engineering, Full Stack Development, and AI Integration**. Expert in designing and deploying local autonomous agents with multi-step reasoning, orchestrating asynchronous automated services, and scaling reliable backends. Focused on optimizing enterprise operational workflows, removing manual bottlenecks by combining applied AI with robust backend systems.

## PROFESSIONAL EXPERIENCE

Full Stack Developer & AI Automation Specialist

Yucatán, Mexico  
2024 – Present

Freelance / Technical Consulting

- Developed the intelligent billing pipeline **Facturas\_Automatizadas** in Python, reducing manual entry time by 90% through asynchronous semantic data extraction and PostgreSQL storage.
- Designed and deployed a high-performance autonomous agent (**agente-ia-archivos-local**) utilizing Ollama, OpenAI SDK, and Qwen2.5, integrating Tool Calling to execute direct filesystem operations via natural language.
- Developed and integrated a heuristic web crawling agent (**agente-investigacion**) in Python and LangChain to scrape, parse, and synthesize complex web data autonomously.
- Built advanced orchestration workflows in n8n, synchronizing relational databases, LLM APIs (OpenAI/Anthropic), and async webhooks, improving operational reliability by 40%.
- Programmed scalable conversational gateways connected to Meta's WhatsApp Cloud API using FastAPI and Uvicorn to manage asynchronous sessions with relational database persistence.

## EDUCATION

Robotic Computational Engineering – Universidad Politécnica de Yucatán

April 2022 – April 2026

Bilingual engineering program (English/Spanish) focused on logical algorithms, mathematics, and software architectures.

## TECHNICAL SKILLS

|                       |                                                                                                      |
|-----------------------|------------------------------------------------------------------------------------------------------|
| Frontend & Full Stack | HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, Responsive UI.             |
| Backend & Databases   | Python, FastAPI, Node.js, Express, REST APIs, PostgreSQL, Uvicorn, Async Webhooks.                   |
| Automation & AI       | n8n, Claude Code, Kimi K3, AI Agents, Local LLMs (Ollama, Qwen), Function/Tool Calling, RAG systems. |
| Tools & Environments  | Git, GitHub, Docker, Linux, Virtual Envs (Conda, Venv), Ngrok, Vercel, Netlify, npm.                 |

## LANGUAGES & CORE COMPETENCIES

Spanish: Native

English: Advanced (C1 - Professional)

German: Basic (A1)

Complex Problem Solving

Software Architecture Design

Automation Strategy
